EDUCATION

Indus University 2022-2026
BTech in Computer Engineering
Ahmedabad, Gujarat (8.5 CGPA)

EXPERIENCE

Codsoft Web Development Intern

- Built responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap
- Gained exposure to front-end and back-end development cycles
- Learned the fundamentals of **HTML, CSS, JavaScript**, and **Bootstrap** while working in a real-world development environment
- Built basic, responsive web pages under guidance, gaining hands-on experience with front-end technologies

CAREER OBJECTIVE

Seeking a Python Internship or Entry-Level Python Developer role where I can apply my programming skills, learn new technologies, and contribute to real-world projects. I am willing to quickly learn and adapt to any tools or technologies required by the organization.

PROJECTS

AGASTYAHOMES – PROPERTY RENTAL & LISTING PLATFORM

- Developed a full-stack accommodation listing platform enabling users to create, edit, and manage property listings with secure authentication.
- Implemented Google OAuth 2.0 login, session-based authentication, and MongoDB-backed user management for secure access control.
- Integrated Cloudinary for image upload, optimization, and storage, supporting multi-image listings with responsive display.
- Designed dynamic listing pages using EJS, CSS, and JavaScript with form validations and interactive UI components.
- Built RESTful routes with Node.js, Express.js, and Mongoose, and deployed the application on Render with environment-based configuration.

Bank Management System (Python, OOP)

- Developed a modular banking application implementing account management, authentication, and transaction processing

- Designed auto-incrementing account number system using class variables
- Implemented secure transaction validation and inter-account fund transfer using object interaction
- Applied data structures (dictionaries) for efficient account lookup and mapping
- Demonstrates practical understanding of OOP principles and real-world system design

AQI Monitoring Drone with ESP32 (Real-Time AQI Dashboar+d)

Designed and developed a drone-based air quality monitoring system using ESP32, sensors, and a custom web dashboard

- Built a real-time dashboard with HTML, CSS, JavaScript to visualize AQI, PM2.5, and PM10 data collected during flight

- Integrated GPS and multiple environmental sensors, and transmitted data wirelessly to the browser

- Responsible for both hardware, software development and ESP32 firmware programming

TECHNICAL SKILLS

- **Languages:**
  Python, SQL, JavaScript, C, C++

- **Python & Data:**
  Object-Oriented Programming (OOP), File Handling, NumPy (Learning), Pandas (Learning), Matplotlib (Learning), Data Analysis (Beginner)

- **Web & Frameworks:**
  HTML, CSS, React.js, Node.js, Express.js, Bootstrap, MERN Stack

- **Databases:**
  MySQL, MongoDB

- **Tools & Platforms:**
  Git, GitHub, Jupyter Notebook, Postman, Vercel, Render

- **Domains:**
  Python Development, Data Analysis (Beginner), Backend Development, REST APIs, IoT
